ABOUT LEXILE LEVELS

MagiCore Learning, LLC is a certified Lexile® Partner. These texts are officially measured and approved by Lexile and MetaMetrics® to ensure appropriate rigor and differentiation for students.

The Lexile Framework® for Reading measures are scientific, quantitative text levels. When the Lexile of a text is measured, specific, measurable attributes of the text are considered, including, but not limited to, word frequency, sentence length, and text cohesion. These are difficult attributes for humans to evaluate, so a computer measures them.

Common Core State Standards uses Lexile level bands as one measure of text complexity. Text complexity ranges ensure students are college and career ready by the end of 12th grade. Lexile measures help educators scaffold and differentiate instruction as well as monitor reading growth.

Grade Band	Lexile® Bands Aligned to Common Core Expectations
K-1	N/A
2-3	420L-820L
4-5	740L-1010L
6-8	1185L-1385L

Keep in mind when using any leveled text that many students will need scaffolding and support to reach text at the high end of their grade band. According to Appendix A of the Common Core Standards, "It is important to recognize that scaffolding often is entirely appropriate. The expectation that scaffolding will occur with particularly challenging texts is built into the Standards' grade-by-grade text complexity expectations, for example. The general movement, however, should be toward decreasing scaffolding and increasing independence both within and across the text complexity bands defined in the Standards."

Math Isn't Impossible

Directions: Read the passage. Look for words with the prefixes in- and im-.

"This is impossible!" I said, as I looked at the incorrect math problem in front of me.

"I believe your thought is slightly invalid, Marcus," my new teacher said, smiling, after she had overheard me.

I slouched down in my seat. That hadn't been a very good first impression. My new school seemed incredible, but my math skills were still imprecise.

I always felt incapable when working with numbers. Perhaps the fact that I infrequently practiced my math facts and dreaded my homework hadn't helped me to become the best math student so far.

It hadn't been that my previous teacher was impatient or that my answers were always incorrect, but I didn't have much confidence with math at all. My writing abilities though? They were impressive!

Just then, another student sat down at the desk near me. She smiled and asked, "May I look at your paper and show you how I solved this one?" I nodded and watched her work. My eyes lit up.

"That's incredible! What an easy way to solve that problem. Thank you for your help," I said.

She grinned. "You're not incapable! You can be a great math student too!"
